

I am a creative, hard working graphic designer with 25 years of experience on Adobe graphics programs determined to make a visual impact on the world that surrounds me. I've made art, in some form or another, a part of my life for as long as I can remember. I've immersed myself in the art and diy music scene starting at a very young age. That experience helped form my particular style of design. I constantly push myself both personally and creatively to be better every day. I am passionate about design and that fuels me to pursue innovative, unique and eye-catching images. My ultimate goal is to create design that achieves iconic status, that is timeless. I am a valuable employee who brings an understanding of doing whatever it takes to get the job done, who comprehends creating good business relationships matter and who appreciates, above all, quality, reputation and high standards are the keys to positive growth for me and my employer.
